

ENERGY LENDING

Serving the Needs of the Energy Industry

MBG is dedicated to providing banking services to middle-market Energy companies that focus on the wide array of oil and gas related activities. Our experienced Energy Lending team specializes in partnering with management teams and sponsors to originate and arrange tailored reserve-based and midstream credit solutions.

Upstream Lending

Our team works with exploration and production companies to meet specific, capital-intensive needs in order to develop existing oil & gas reserves, finance acquisitions of additional reserves, and provide working capital financing.

Midstream Lending

The Energy Lending team is available to help finance existing or new processing systems and facilities, finance construction of gathering and pipeline systems, and provide capital for water storage, treatment, and disposal systems.

Cash Management

Our customized treasury management solutions are carefully tailored to meet your business's changing needs, so you can focus on running your business.
